

BARAT VARSAN R S

Erode, Tamil Nadu, India | baratvarsan@gmail.com | +91 9080457179 | [linkedin.com/in/bobby26](https://www.linkedin.com/in/bobby26)

PROFESSIONAL SUMMARY

Full Stack .NET Developer with AI/Agentic AI experience, skilled in C#, ASP.NET Core, Angular 21, TypeScript, and RESTful API design and development. Builds AI Agents and agentic AI workflows (MCP, RAG) to automate business tasks, with additional experience on US tax return platforms and a strong backend foundation in MySQL and SQL Server from prior logistics billing and shipment-tracking work.

TECHNICAL SKILLS

Backend / Back-End: C#, ASP.NET Core (.NET Core), REST APIs, Web APIs, RESTful API Design, Entity Framework Core, CQRS, MediatR Pattern, Monolithic & Microservices Architecture, MVC Architecture, CRUD Operations, JWT Authentication, SSO (Single Sign-On), Security & Logging, API Integration, XML/JSON Handling, Unit Testing (xUnit, Moq, FluentAssertions, FakeItEasy)

Frontend / Front-End: Angular 21, TypeScript, JavaScript, HTML5, CSS3

Databases: SQL Server, MySQL, Database Design

AI & Automation: AI Agents & Agentic AI, Agent Orchestration, MCP (Model Context Protocol), RAG (Retrieval-Augmented Generation), LLM Integration, Prompt Engineering, Automation

Tools: Git/GitHub, Visual Studio, VS Code, Postman, Azure DevOps (ADO), Python

PROFESSIONAL EXPERIENCE

Software Developer

Oct 2025 - Present

Propel Techlabs India Pvt Ltd — India

Full Stack Developer across tax technology, AI agent automation, and applied AI proof-of-concepts, using C#, ASP.NET Core, Angular 21, TypeScript, and Python. Worked across monolithic and microservices architectures, applying CQRS and the MediatR pattern, with SSO-based security and centralized logging. Used Azure DevOps (ADO) for backlog tracking and CI/CD.

AI Agent Development Platform

- Designed and built AI Agents that use large language models to automate multi-step business tasks and reduce manual effort on repetitive workflows.
- Explored AI-driven task automation and scheduling, including recurring tasks, condition-based triggers, and task lifecycle/execution-state handling.

AI-POC — AI-Powered Applications & Automation

- Developed proof-of-concept AI applications, including an interactive chat interface with dynamic UI workflows and image-processing pipelines for contextual AI inputs.
- Built a WhatsApp monitoring and summarization POC (using Baileys) and automated structured PDF, PowerPoint, and Word document generation using Python.
- Learned and applied agentic AI concepts including Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), and agent orchestration to coordinate multiple AI agents.

Intelligent Form Version Analysis — US Tax Return Platform

- Built spatial/geographic (GIS) mapping views and year-over-year comparison tools across multiple US tax return forms within a full-stack C#/ASP.NET Core and Angular application.
- Designed and consumed RESTful APIs to power dynamic, data-driven tax comparison views backed by SQL Server.
- Used Python with LLM-based processing to analyze and compare tax form versions and surface relevant differences.

PHP Backend Developer -> Software Support Engineer

Jan 2024 - Sep 2025

CSD EXPRESS LLP — Bangalore

- Developed core backend modules and RESTful APIs for a custom logistics billing system — bill entry, tracking, consignor/consignee management, reporting, search, and Excel exports — using PHP, MySQL, and JavaScript.
- Automated bulk Excel-to-PDF invoice generation and built a Python-based POD extraction tool that pulls shipment proof images by AWB number.
- Provided technical support for internal logistics tools and collaborated cross-functionally to align features with business operations.

EDUCATION

Bachelor of Engineering (B.E), Computer Science and Engineering

K.S.R. College of Engineering, Tiruchengode — 2024 | CGPA: 8.01 / 10
