SUMMARY

IT Support Executive with experience in developing and maintaining a logistics billing system using PHP and MySQL. Skilled in creating shipment tracking, billing reports, and user management modules. Familiar with API integration and database handling. Currently learning cloud tools to enhance backend and deployment skills.

SKILLS

Languages & Frameworks: PHP, C#, Java, HTML, CSS, JavaScript, ASP.NET Core, RESTful APIs, MySQL, SQL Server, Entity Framework Core, XML/JSON Handling, API Integration

Tools & Technologies: XAMPP, phpMyAdmin, Git/GitHub, Visual Studio, VS Code, Postman, SSMS.

Development Concepts: Form Handling, CRUD Operations, Session Management, JWT Authentication, MVC Architecture

Logistics Domain Expertise: Shipment Tracking, Billing Systems, Excel Reporting, AWB Management

EXPERIENCE

Backend Developer → Software Support Engineer

CSD EXPRESS LLP, Bangalore, Jan 2024 - Present.

- Developed core backend modules for a custom logistics billing system using **PHP, MySQL, HTML, and JavaScript**.
- Built and maintained key features including **bill entry, tracking, consigner/consignee data management, status updates, and Excel exports**.
- Designed RESTful APIs to **fetch and display reports dynamically** and supported **bill search, modification, printing, and tracking**.
- Automated manual processes by writing **Python scripts to convert bulk Excel files to PDF invoices**.
- Created a **POD extraction tool in Python** that pulls shipment proof images based on AWB numbers from Excel sheets.
- Provided **technical support** for internal logistics tools, resolving user issues, handling bug escalation, and managing documentation workflows.
- Reduced repetitive tasks by implementing **script-based automation** for file handling and reporting.
- Used **MS Excel, phpMyAdmin, and XAMPP** for data handling, invoicing, and local development.
- Collaborated with cross-functional teams to align technical features with **business operations and logistics workflows**.

Projects

Hostel Out Pass Management System (June 2022 – May 2023)

- Developed a web-based out pass management system using **HTML, CSS, PHP, and MySQL**.
- Allowed students to submit pass requests and wardens to approve or reject them.
- Enhanced request turnaround time and improved process transparency.

House Price Prediction – Machine Learning Project (May 2023 – May 2024)

- Built a regression model using **Kaggle's housing dataset** to predict property prices.
- Performed **EDA and feature engineering** to identify key pricing factors.
- Used **Support Vector Machine (SVM)** to model non-linear data patterns and visualized insights using **Matplotlib** in Python.

Education

Bachelor of Engineering (B.E), Computer Science and Engineering

K.S.R. College of Engineering, Tiruchengode — 2024 **CGPA:** 8.01 / 10
